- Since 1 July 1947, Kalinavag, the first large railroad car factory to be re-eq- uipped with reparations material, has been in operation in Kaliningrad (Koenigs- berg). The first scheduled production series is to be comprised of 300 rail- road dump-cars with a load capacity of 40 tons and automatic brakes constructed according to the Karsensy system. Unloading is done by means of steam pressure produced in ten minutes by the engine and serving 30 cars. The cars have American-type automatic self-coupling and there is one buffer in the middle of the end of each car.

3. A large munitions plant was put in operation in Kaunas, Lithuania, in the spring of 1947. Security measures were handled with particular severity, and the German war prisoners who had been set to work in the plant were not allowed to leave the factory grounds but were housed in barracks within the grounds.
